Sequence 45, Application US/08210762E

Patent No. 583741

GENERAL INFORMATION:

APPLICANT: Hielle, Brian

APPLICANT: Jenison, Steve

TITLE OF INVENTION: Molecular Clones Producing Recombinant DNA Antigens of

TITLE OF INVENTION: the HARDS Virus.

NUMBER OF SEQUENCES: 85

CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Gaps
US-VB-Z/L-942A-102/C

Sequence 102, Application US/08271942A

Patent No. 55500E

GENERAL INFORMATION:

APPLICANT: Gallie, Brenda L.

APPLICANT: Dunn, James M.

APPLICANT: Bunn, James M.

APPLICANT: Stevens, John K.

TITLE OF INVENTION: Method, Reagents and Kit for Diagnosis

TITLE OF INVENTION: Method, Reagents and Kit for Diagnosis

TITLE OF INVENTION: Method, Reagents and Kit for Diagnosis

TITLE OF INVENTION: Method, Reagents and Kit for Diagnosis

TITLE OF INVENTION: Method, Reagents and Kit for Diagnosis

TITLE OF INVENTION: Method, Reagents and Kit for Diagnosis

TITLE OF INVENTION: Mad Targeted Screening for Retinoblastoma

OLIGODEOXYNUCLEOTIDE OF PHOSPHODIESTERASE AND
INDUCEMENT OF APOPTOSIS IN HUMAN LYMPHOBLASTOID CELLS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         US-09-156-253-29

Sequence 29, Application US/09156253C

Patent No. 6001652

GENERAL INFORMATION:

APPLICANT: Monia, Brett P.

APPLICANT: Cowsert, Lex M.

TITLE OF INVENTION: Antisense Modulation of CREL Expression

FILE REFERENCE: RE-0010

CURRENT APPLICATION NUMBER: US/09/156,253C

CURRENT FILING DATE: 1998-09-18

NUMBER OF SEQ ID NOS: 48

SOFTWARE: Patentin Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Query Match 2.9%; Score 12.2; DB 1; Length 18; Best Local Similarity 82.4%; Pred. US-00-569-959-18/C

is Sequence 18, Application US/08569959

Patent No. 5725862

is GENERAL INFORMATION:
APPLICANT: Timothy F. Murphy
TITLE OF INVENTION: Vaccine For Branhamella catarrhalis
TITLE OF INVENTION: Vaccine For Branhamella catarrhalis
TITLE OF SEQUENCES: 52
CORRESPONDENCE ADDRESS: 52
ADDRESSEE: Hodgson, Russ, Andrews, Woods & Goodyear STREET: 1800 One Mer Plaza
CITY: Buffalo
STATE: New York
COUPTRY: United States
ZIP: 14203-231
COMPUTER READABLE FORM:
MS-DOS, Microsoft Windows 3.1
COMPUTER: ID Morpatible
OPERATING SYSTEM: MS-DOS/ Microsoft Windows 3.1
COMPUTER: Wordberfect for Windows 5.1
CURRENT APPLICATION NUMBER: US/08/569,959
FILING DATE: September 29, 1993
ATTORNEY/AGENT INFORMATION:
REGISORATION NUMBER: US/08/569,959

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        VS-08-378-860-3/c

Sequence 3, Application US/08378860

Patent No. 5731294

GENERAL INFORMATION:
APPLICANT: Smith, Lois E.H.
TITLE OF INVENTION: Inhibition of
TITLE OF INVENTION: USCF-Specific
TITLE OF INVENTION: VEGF-Specific
TITLE OF INVENTION: Oligonuclectides
NUMBER OF SEQUENCES: 53
CORRESPONDENCE ADDRESS:
ADDRESSEE: Lappin & Kusmer
STREET: 200 State Street
CITY: Boston
STATE: Massachusetts
COMPUTRY: USA
ZIP: 02109

COMPUTRY: IBM PC compatible
COMPUTRY: IBM PC COMPATION SYSTEM: PC-DOS/MS-DOS
                                                                                                                                                                                                                                                                                                                SOPERATING CORRESS SOFTWARE CURRENT APPLICATION DATA:
